Senior Software Engineer with 9 years of experience designing and building scalable backend systems in Java. Strong expertise in Spring Framework, Java EE, Docker, and cloud-based architectures. Experienced in delivering production-ready services, improving system reliability, and optimizing performance.

Technologies and Languages

Languages: Java, JavaScript, HTML/CSS, SQL
Technologies: Spring Framework, Java EE, JUnit, Mockito, React, Postgres, Docker, Kubernetes
Other: data structures and algorithms, API design, unit and integration testing

Work Experience

Senior Software Engineer | **Omio** | **Nov 2022 – Present**
Berlin, Germany

Working in the Organic & Paid Acquisition team, responsible for driving the majority of Omio's traffic, contributing to scalable growth across SEO, performance marketing, and conversion optimization initiatives.

- Led implementation of real-time Gross Profit attribution via server-side GTM, replacing a 24h delayed pipeline and enabling direct profit-based bidding in Google Ads, driving a shift from revenue- to real-time profit-optimization and delivering +1 828 incremental customers/week (95 000+ annualized) and €6,65M incremental GBV through improved bidding accuracy.
- Led Busradar website migration to static landing pages, preserving organic visibility and ~70% of revenue while fully decommissioning legacy infrastructure (servers, databases, hosting), eliminating security risks and server costs without traffic loss (stable GSC/GA metrics).

Software Engineer | **Hyand** | **Sep 2019 – Oct 2022**
Wolfsburg, Germany

Worked on a project for the largest German automotive manufacturer:

- migrated the translation application to the latest Spring version. Implemented building pipeline with Maven and Jenkins. Simplified code base by 20%;
- implemented the new feature to comply with the GDPR;
- optimised local building process and reduced code duplication by 3 times;
- migrated deployment process from SVN to GIT;
- migrated 3 standalone background jobs to MDB;
- containerized the main application and its database.

Java Developer | **I-TECO** | **Jul 2017 – Aug 2019**
Innopolis, Russia

1. A project for the largest Russian food retailer company:

- developing back-office for managing store;
- developing system for managing promo;
- integration with weighing and labelling equipment;
- configuration integration with external systems (SAP).

2. A project for the oldest Russian bank:

- developing business layer for deposit services;
- developing integration modules for communication with external systems;
- writing unit and integration tests;
- configuring deployment pipeline.

Team Leader | **Bestrank** | **Apr 2011 – Mar 2017**
Saint Petersburg, Russia

Jack of all trades in a small IT company:

- a career from a junior developer to a team leader in 2014;
- participated in more than 140 projects. Mostly, e-commerce projects, but CRM systems and non-trivial projects as well;
- worked on tasks as a member of a medium team (3-5 people);
- coordinated & estimated tasks;
- planned projects budget and deadlines;
- managed code review;
- led a choice of the technology stack;
- made up project architecture;
- mentored new team members.

Education and Certifications

Oracle Certified Professional: Java SE 11 Developer — **Apr 2021**

Oracle Certified Associate: Java SE 8 Programmer — **Jun 2018**

Advanced training «Software development using Java Enterprise Edition», Innopolis University, Russia — **Apr 2017 – Jun 2017**

M.Sc. Computer Science, Saint Petersburg State University of Aerospace and Instrumentation, Russia — **Sep 2009 – Jun 2014**
